File #:888-5079

Dear Ms. Chacon:

The patient is doing very well. He went back to work Monday but he wears rubber boots, jumps fences, is in mud, etc. He felt good by Thursday, bothered a little on Friday and then he poured some concrete at home on Saturday and it hurt on Sunday. He has a little bit of swelling, a little stiffness. He has a good range of motion, no crepitus, negative McMurray.

I gave him a few Orudis out of the office. He will taken these for a week or ten days and I will see him again in about three weeks. His progress is satisfactory.

Sincerely,

Clarence M. Leary, M.D.
