- Return to Full Duty on restrictions. with no limitations or

CONTINUE WITH: Modified Work Full Duty

#####

DATE OF EXAM: 10/16/00 PART OF BODY: LEFT KNEE

#####

Patient returns to the office today for reevaluation. Overall, his knees are doing better. He continues to take the Celebrex as an anti-inflammatory agent. He feels that his health club is helping him to do his regular exercises and use a jacuzzi for heat applications. On examination, medial joint line tenderness was minimal bilaterally. There was no effusion of either knee. No crepitus noted with range of motion. Patient is ambulating without a limp.

ASSESSMENT: Left knee medial compartment osteoarthritis. Osteoarthritis of the right knee.

PLAN: Gym membership will continue for an additional six months if possible if approved by the work comp carrier. Lab work will be done to monitor renal/hepatic hematologic toxicity to the medication. The last lab work was done in 1999. I will be seeing him back in three weeks time to discuss the results of the lab work.

Edward L. Cahill, M.D./jh

"I have not violated Labor Code Section 139.3 and the contents of the report and bill are true and correct to the best of my knowledge. This statement is made under penalty or perjury."
