

10/25/94 4:00pm

EL & OB Made Decision To cold fog Ringe tract
weds pm Because of 3-4-p Found by Insps
of operator 60-70% Mosq were 3-4-p in old water areas
Also Decided @ that time put fish in Areas not previously
planted, on wed. I also ask what about completing
cold fogs that had been started last week of Town
Areas we discussed the Re-Insps. That Harry Fraser
had made & that Mosq were as bad or worse
EL made statement that John Stroh was NOT
in favor of that way of controlling Mosq in Town
we came to the conclusion we would make
a decision on wed. @ this meeting was ARRON OB,
& EL.

10/26/94

On this am meeting as LF & OB filling croppers
called EL asked him what materials told him we were
out of cythion he said we could use some crop spray
LF & I went more house talked over maybe using some
crop spray but other fogger we could use scoupe
in already harvested areas of Island. We decided
to ask T.R.S if this was ok LF asked about
this time are we going to fog Town areas
I said to him I don't think so because EL said
last night that T.R.S. was not in favor of it
so I said lets ask him also why he is not in favor
of fogging Town areas. we went to office
and it 10 AM or so we use the material but

10/25/21

From then on things changed He said that other things could be done to stop Rose & the Service instead of shooting Emerged adults. I told him we had made a decision to C-Fog this evening or flooded fish. He asked when we had inspected & what we had found. I told him that Ed S along with others had traps, samples of Rose & that breeding was 60-70% of breeding 2400 & many heavy pupa in specific areas of flooding. He said ok we won't fly it.

JRS why not fly flooding we can use creasone with Vecto Bac & have C-Fogger out there at same time in Daylight instead of Fogging at night.

He said what else are you doing I said fish is being caught at River Service for areas of flooding that had no fish at this time.

Terry George walked by & that time I said fish where are you getting fish I told him & he said he wanted them for white slough project.

Then Ed Greenberg walked by & said if you don't mind to use the fish from my area we want we finally came to conclusion that we needed fish for Eds & that we would not plunder the fish population for white slough project I asked JRS that before all these changes don't he think that
