- Remain off work until \_\_\_\_\_ with the following
- Return to Modified Work on \_\_\_\_\_ limitations and instructions: \_\_\_\_\_ with no limitations or
- Return to Full Duty on \_\_\_\_\_ restrictions.

CONTINUE WITH:  Modified Work  Full Duty

#####

DATE OF EXAM: 11-1-99 PART OF BODY: LEFT KNEE

#####

Patient returns for reevaluation. He has had some lab work done which did reveal hypokalemia with potassium of 3.2. This has been address by his family physician, Dr. Buckingham, who placed him on potassium pills. He has also been encouraged to increase intake of oranges and bananas. The patient is on medication for hypertension, including Accupril and Lozol. Left knee examination was unchanged with medial joint line pain. Patello-femoral grind test was negative. No effusion noted.

ASSESSMENT: Osteoarthritis of both knees, status post left knee arthroscopic partial medial meniscectomy.

PLAN: Celebrex will be continued as an anti-inflammatory agent. I plan on reevaluating him in 3 months. I do not think the patient requires earlier evaluation unless he has a flare-up of pain and difficulty.
