DIAGNOSIS

1. 836.1 /

WORK STATUS: This patient has been instructed to

- ☐ Remain off work until
☒ Return to modified work with the following limitations and restrictions: **No squatting or climbing, standing and walking intermittently.**
☐ Return to full duty with no limitations or restrictions.
Continue with: ☐ Modified Work ☐ Full Duty

Date of Exam: January 20, 2010 Part of Body: Right Knee

Subjective: Tiffany has had some improvement trying to work out at the gym. She has been performing light weights.

Objective: She has no effusion of her knee, but there is some mild soft tissue swelling and tenderness over the lateral joint line.

ASSESSMENT: Right knee recurrent lateral meniscus tear with lateral meniscal cyst. The patient is symptomatic and would benefit from repeat arthroscopy and possible open excision of the meniscal cyst. She is agreeable to surgical treatment. In the meantime, she will continue home exercises. She informs me that no light duty has been available; however, she has been submitting her work status form, which includes a request for light duty, to her supervisor. She will follow-up in the office in 4 weeks unless surgery is approved prior to her next visit.

I have not violated Labor Code Section 139.3, and the contents of the report and bill are true and correct to the best of my knowledge. This statement is made under penalty of perjury in San Joaquin County, CA, dated 1-25-10.

Gary T. Murata, M.D. / jaq
