DIAGNOSIS

1. 836.1 / 717.7 /

WORK STATUS: Modified work. No squatting. No climbing. No driving commercial vehicle.
Walking and standing occasional.

- ☐ Remain off work until:
☐ Return to modified work with the following limitations and restrictions:
☐ Return to full duty with no limitations or restrictions.

Continue with: ☐ Modified Work ☐ Full Duty**Date of Exam: January 10, 2012****Part of Body: Right Knee**

Subjective: Tiffany has not made much progress with therapy. She missed two weeks because of an illness, perhaps the flu over the holidays. She received two weeks of therapy. She continues with generalized anterior knee pain about the right knee.

Objective: No effusion of her right knee with good range of motion. Mild generalized anterior tenderness including tenderness along the anteromedial joint line.

Assessment: One month following arthroscopy of the right knee with partial lateral meniscectomy and chondroplasty of the medial femoral condyle.

Plan: Continue therapy two times per week for four weeks. Return to modified work if available. Even though Tiffany is taking up to 8 Norco per day also prescribed for migraine headaches, I encouraged her that her knee could improve following arthroscopic surgery as well as continuation of her physical therapy.

I have not violated Labor Code 139.3, and the contents of the report and bill are true and correct to the best of my knowledge. This statement is made under penalty of perjury. Dated 1/13/12, at San Joaquin County, California.
Gary T. Murata, M.D./sh
