DIAGNOSIS

1. 836.1 /

WORK STATUS: This patient has been instructed to

- Remain off work until
 Return to modified work with the following limitations and restrictions:
 Return to full duty with no limitations or restrictions.
Continue with: Modified Work Full Duty

Date of Exam: March 03, 2009

Part of Body: Right Knee

Subjective complaints: Tiffany still takes Vicodin twice per week. She also has pain after using an elliptical trainer for one hour.

Objective findings: On physical examination, she has no effusion of her knee with good range of motion. She is walking well.

Assessment: Slow improvement following partial lateral meniscectomy. Since she is still taking two hydrocodone per week and is having anterior knee pain, I would like to follow her in two months. At that time she should be permanent and stationary although she has returned to full duties. She has done well with decreasing her narcotic usage.

I have not violated Labor Code Section 139.3, and the contents of the report and bill are true and correct to the best of my knowledge. This statement is made under penalty of perjury. Signed on 3/4/09 in the County of San Joaquin, CA.

Gary T. Murata, M.D./jh
