Regarding: Written Explanation of My Financial Situation

Dear MFAP:

Enclosed with this letter please find my completed MFAP application. I am writing you this letter in support of that application and to explain my current financial situation. I am hopeful that this letter will be detailed enough to trigger your approval of my application.

Since 11/6/2013, I have been without any income. That is the day that my wage-replacement benefits expired. I used to work as a Pesticide Applicator for the San Joaquin County Mosquito and Vector Control District. Since November 23, 2011, I have been off work due to my employer not providing me with modified work duties nor allowing me a lateral job transfer to a less-demanding position. During the whole duration of my employment, I was exposed to harmful chemicals.

My past records as a KP patient would clearly reflect those assertions to be true. I remain listed as an employee on that company's website but I am not given any work nor am I being paid a cent.

I currently survive by living with my elderly and infirm cousin, in her home. Originally, I was renting a room from her. Now my cousin provides me with room and board. I live off of her kindness in the form of gifts. I have been unable to return to work due to her needs. I remain in protracted legal battles with my employer.

Aside from the gifts referenced above, I currently have no other source of income, am in a multitude of debts, and have been in this situation for over four months. I have the need for medical coverage and as a past KP patient all of my medical records are on file.

If further clarification or details are needed
then please don't hesitate to contact me
this letter and application to continue

Sincerely,
