

Mount

6-18-19

Thursday June 18

late lacc dump w/ Roy 1 hr.

H* meeting w Brian over time on 120 dairy. 2 hours.

Very upset. cried from meeting to end of day

Friday June 19

inspection & treatment of Sutliff, found problem at 11:30 re load

tank was able to treat suspect 1/4 of problem, Brought in sample for Ick Dave Id larva as torsalis. wait for pup Id.

N Brian was not around to communicate information on Casera + McKinsey. Called 4:45 and

wanted to know what was said about Thursday 6-18 from office. He said not much.

Told him: Rosh from Lovebee, Need to inform about Fridays find on Monday. He said o.k.
