Bob & Eddie

My "issues" stem from a long history of double standards and conflicts of interest. I guess I could have slept with someone as well. I just didn't know it was a requirement to keep my footing there at the district. Somehow Jack Fiori is on the board and it has never been a conflict. You have allowed the district to protect, promote and give special privileges to a select four instead of protecting your clients interest as a whole.

Why is Bob Durham still employed and I am not? What does a team player look like?

This blatant abuse Duane endured looks just like the Skelly charges I was bullied with. The same format used and the same manager. Now he has couples to use as resources to manipulate dishonest actions. Much more efficient I must say. I have always believed working hard and being honest was enough to keep a job. When I was required to choose my moral beliefs over my job it was hell because I had a daughter at home who depended on me to keep her safe. Just like I expected you, John, Eddie and the board to keep me safe. Except I did my job and protected her. I have more of these documents they are endless. These have never been my issues Bob they are the people who lack in moral character and ethics, they just got dumped on me because I was standing there and was mistaken for someone who would allow it. Is it in the MOU that employees who sleep with their supervisors can come to work late for 3 years? Or threaten and attack their co workers? These "issues" now belong to you. I am going to honor Duane by ensuring the documents he kept are published in a public forum. It's not cool to bully people. I have been the victim of bullying and I have documents of a 20 year history of bullying.

What happened to Duane and myself is criminal. Eddie committed the crimes and I will ensure the right agency or entity knows. Bob I hope you retire soon or get better at helping the ones who do not get special protection by joining the gossup about your co worker and climb over their back club. I never went around kissing ass or sleeping around so I could maintain my status. Silly me for thinking I was doing the right thing. Their is no effort in keeping a equal work place. Instead you condone rewards that were not attained by merit. I have watched your couples sit on their phones for whole work days, stealing company time. Dates documented.

You are wrong regarding the formalin. Why would you do that? I know I am not smarter than either of you so why are you violating the rights of the employees that were exposed. Eddie needs to produce my medical records! You are breaking the law. Formalin causes many cancers and I have medical conditions that warrant treatment. Maybe I could do a presentation for the staff. I can share all that I have learned. Joe Sarale hospitalized with phenomena and you knew why. How can you look him in the eyes? I want life time medical Eddie and a settlement offer, nothing has changed on my end. You caused harm to me with intent and I have a right to be made whole. You have many law firms to prevent your employees from being protected from the dangers of their jobs. You are violating my FOIA request I submitted. I will continue to publicly expose the violations and abuses of the district until you come to me with a settlement that is not insulting.

Do you have intentions to end this relationship or are you going to comply with my rights to the documents that I am entitled to?

This relationship goes two ways. I am not going to give up like you expected of me. Take a long look at my application again Eddie and while your at it send me the whole thing this time. The part where all my leadership skills are and my job as a parent is my most important. I have always been very nice. I have not been treated nice at all. It's time to show me respect.

I can't make you do right by all your employees but I will stand up for myself. Where are we going from here? It's 2014 you may have removed my name from the site but I am still here.

And by the way Eddie you need to start being forthright about Voight because I Morgan and Janine have been there multiple times to work. The money you use is not yours it belongs to tax payers. So when you start rewarding criminal conduct or better yet participate in it you are going to answer for it. You took my chemicals away from me. You Eddie not John.
