DIAGNOSIS

1. 836.1 /

WORK STATUS: This patient has been instructed to

- Remain off work until
- Return to modified work with the following limitations and restrictions: **No climbing or squatting, walking and standing intermittently.**
- Return to full duty with no limitations or restrictions.
- Continue with: Modified Work Full Duty

Date of Exam: August 11, 2009 Part of Body: Right Knee

Subjective: Tiffany has had slight improvement of her knee since I saw her last. No light duty is apparently available. She still notes some intermittent swelling of the knee. She does take 3 Norco per day.

Objective: Physical examination reveals anterior diffuse knee tenderness, good range of motion of her knee, gait pattern mild limp.

ASSESSMENT: Continued anterior knee pain syndrome following partial lateral meniscectomy.

PLAN: Tiffany would like to have another month before considering the alternative of being permanent and stationary. I think this is reasonable. She will continue a home exercise program. She can perform modified work. She should not take more than 3 Norco per day. Follow-up in the office in 1 month. At that time she could be considered permanent and stationary.

I have not violated Labor Code Section 139.3, and the contents of the report and bill are true and correct to the best of my knowledge. This statement is made under penalty of perjury in San Joaquin County, CA, dated 8-12-09.

Gary T. Murata, M.D. / jaq
