cal/epa

Tiffany,

hi...
I've been trying to get information from Ed Lucchesi and he's basically ignored me. I'm giving him one week to provide the information after that I'm filing under the Freedom of Information act and if that doesn't work, filing with DA's office and Attorney General's office for violating the Brown Act.
The information I've requested pertains to the trips board members make for the district; Lucchesi said board members join district directors on seminars, conferences and informational tours for the district, after, the board member goes back to the board and gives information about how it might pertain to the district.
I asked for the number of times board members go, which ones went, what the cost is to taxpayers, and the date of each conference as well as dates board members brought information back to the board.
Also told Lucchesi that I've read the grand jury reports and was going to do a story about the problems at the district that warranted so many grand jury investigations; also told him I'd compare other abatement districts to his district, see how they handle such problems or if they have such problems.
So far, nothing. I don't think Ed is happy with me.
And this is what I do and what I've been doing for a living. I sort of feed off this stuff.

Roberta Jetter with Department of Pesticides Regulations

Re: Following up with Cal EPA complaint

916-323-3197

She requested a report and has not received one yet

I can call the 2 agencies they should have released reports I can call them and request copies and follow up with Roberta

Ag Commissioners Office
