December 2, 2015

Formaldehyde formalin in the use you exercised falls under Sara title 3. I have repeatedly asked under all forms of freedom right to know disclosures and I want you to produce tangible and visible evidence of the purchase orders you have to have in your possession to report expenditures legally. If you can not produce these for me these are grounds for an audit. Please produce the purchase orders for the chemicals, medicines and products used and stored for your hatchery operations from the years 2003-2015.

This is a right to know category. Not a workers comp. It's a fiscal matter because you refuse to make this a public and you need to disclose how much money you spend on your fish hatchery operations which I have noticed your MVCAC Joint Powers takes great pride in claiming to take indigenous fish that from the wild and hold them captive to provide to the public in lieu of using harmful pesticides.

The truth is your White Slough Facility is a money pit that "flies" under the radar of compliancy and true accountability. I am calling you out on your intentional vague reporting of fiscal matters with poisonous consequences.

I await these purchase orders to be made public in your December 15th board meeting.

Sincerely

Tiffany Kay Anderson
