Pam,

Can we please schedule an appointment. I need some of your insight and education. AIMS has decided that my injury is an aggravation and not a new injury which is absolutely ridiculous. On top of screwing me for benefits as they have claimed I have used all my TTD's they have decided I am not eligible for any settlement. I had a QME prior to my surgery. The surgeon found a tare. Dr. Tabbador said my injury was a new one then wrote in his report that it was an aggravation. I am getting screwd by this attorney Eric Helphrey. They can't pay any ttd's or settlement yet they can pay him to have all my medical records subpoenaed for the last 20 years even though the information has no relevancy to my injury. The insurance company has also had a private eye following me. Now Eric the attorney has written a 20 page in my words intimidating my surgeon to release me prior to my recovery. Since this insurance company is not spending any money in ttds or settlements and I have two life time medical they are not out. I feel like my privacy has been breeched and this attorney could care if I had a successful recovery. I am on my forth week of recovery. This is the third surgery on the same body part. I want to make sure I have a full recovery.

I need to meet with a INS officer and find out what my right are and what I can do.

I have a deposition scheduled for 1-12-12 for the 132-A.

Can you please look at your calendar and schedule me in?

Sincerely,

Tiffany Anderson
