**SUPPLEMENTAL REPORT**

**RE:** ANDERSON, TIFFANY  
**Case #:** 20448044  
**DOB:** 08/22/1970  
**Date of Injury:** 06/29/2011  
**Employer:** San Joaquin County Mosquito Vector Control District  
**Claim #:** VE0700184

Dear All:

As you will note, I have seen the claimant, Tiffany Anderson, most recently in 2016. I had noted right knee issues, more widespread issues, actual or possible psychiatric issues, the possibility of a toxin, and overall medical situation. I had noted that chemistries had shown low estrogen-progesterone levels. I noted that these "could" represent ovarian failure or might represent a pituitary problem of "whatever" cause or other endocrine failure issue. I thus had requested some further studies in May 2017.

These were apparently done in October 2017 and faxed to my office in late March of 2018.

To summarize them, they are "not entirely normal." The claimant's estrogen level is below normal for functioning ovaries and in the normal range for post-menopausal ovaries. The ACTH in plasma is 6 which is borderline low. The FSH, also a pituitary test, is normal for the post-menopausal state. The LH is abnormal for functioning ovaries and is even above the post-menopausal level. The progesterone is of post-menopausal levels. The prolactin is normal.

These data are most compatible with ovarian failure of whatever cause, the ACTH level could represent a pituitary problem but the other pituitary hormones (FSH, LH, prolactin) are normal or high.

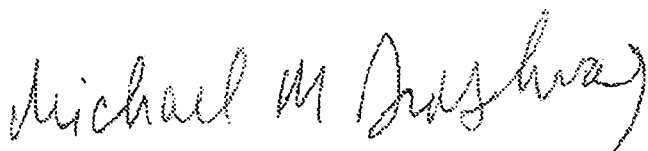

The following seems indicated:

1. OB-GYN examination (assuming one hasn't been done).
2. Further evaluation, that might include abdominal ultrasound, endocrinological or gynecological evaluation, and MRI of brain-head relevant to pituitary issues.

I will of course be happy to see the claimant back again at any time, but the possibility of this being a work-related issue is "possible" but "not very possible." I ask the parties to please let me know what more I am asked to do. Since I ordered these tests (a long time ago), I cannot charge for this report unless I get written authorization from the parties.

*I certify that I reviewed all available medical records, and composed and drafted the conclusions of this report. The conclusions and opinions within this report are solely mine. I declare under penalty of perjury that the information contained in this report and its attachments, if any, is true and correct to the best of my knowledge and belief, except as to information that I have indicated I received from others.
