PO BOX 477
LODI, CA 95241

Patient Name: Tiffany Anderson
Medical Number: 822204
Date of Service: October 27, 2017

Delta Radiology appreciates your confidence in us, and thanks you for allowing us to participate in your health care. Your recent mammogram results are:

Normal. Your recent mammogram shows NO evidence of cancer.

If you are over the age of 40, the American College of Radiology recommends that you have yearly screening mammograms. If you are under the age of 40, consult your doctor for mammogram recommendations. Please keep in mind that mammography is an important test for detection of breast cancer, however as many as 10% of breast cancers are not detected by mammographic exams. Therefore optimum breast care includes a combination of three important steps: monthly self breast examination, an annual examination by your doctor, and regular mammograms. Should you develop a lump or detect abnormalities before your next screening, please contact your doctor immediately.

Sincerely,

Delta Radiology Medical Group, Inc.
